

Horror Movie Database
Michel Beaubien

Hello Marco.

Here is a document explaining the steps I took to build the database and the search bar functionalities. First I'll show the table structure I went with for my database.

Movie Image	movie_img
Movie Thumb	movie_thumb
Movie Title	movie_title
Movie Year	movie_year
Movie Rating	movie_rating
Movie Duration	movie_time
Movie Genre	movie_genre
Movie Director	movie_dir
Movie Stars	movie_stars
Movie Description	movie_desc

Let me quickly mention the colors displayed in the site, get that part over with.

Hex - D4AF8E RGBA - 217 175 142	Hex - 790E0F RGBA - 121 14 15	Hex - 5B0A0D RGBA - 91 10 13	Hex - 380608 RGBA - 56 6 8	Hex - 1F1B1A RGBA - 31 27 26
------------------------------------	----------------------------------	---------------------------------	-------------------------------	---------------------------------

As you will see, I have a HUGE collection of movies in my database, what can I say, I love horror movies. I am going to be pushing this search bar to the limit, this is most definitely a project that I'll be continuing to work on once it's been submitted. Since assigned on Tuesday, I've already put in at least 50 hours, EASY, into this project. It's driving me to figure stuff out! There is so much I want to do with this, such as having ANY search come back with a result NO MATTER the key pushed. EX: Halloween has a "W" in it, but the title Halloween does not appear when "W" keyed down. I DO KNOW why, but it's something I'm going to have to figure out after this has been submitted. I'm also going to include a filtering system, so YES all my movies are horror genre, but within the horror genre, there are sub-genres, such as mystery, thriller and drama. There WILL be a filtering system. You will see this site has some nice functionality to it already. I'm pretty proud of myself for working this hard.

PLEASE KEEP IN MIND THAT THIS SITE WORKS 100% AS IT SHOULD ON FIREFOX, ON CHROME IS HAS SOME "BUGS" WITH THE SEARCH RESULTS DIV. PLEASE KEEP IN MIND THAT THIS IS AN ISSUE THAT "YOU" MIGHT SOLVE RIGHT AWAY, BUT REALLY, AND I MEAN REALLY, I DONT KNOW WHY ON CHROME AS ISSUES BUT NOT FIREFOX... YOU WILL SEE THE .STYLE. BEING CALLED IN MY JAVASCRIPT FILE. YOU WILL SEE . THANK YOU MARCO

PS. The next few pages are ONLY what I have written on paper. ALL OF THE MOVIES, EVERYTHING on paper before database entry. Genres (Horror/Drama/Mystery/Thriller/Crime/Sci-Fi)

Movie Database

All of these have a poster and thumb image(title, year, rating, duration, genre, director, stars and desc)

Thank you Sir for reading through this document, I hope you see how hard i've worked, and how hard I CAN work when I put my mind to something.

MB Web Developer

My last remarks before submitting this awesome project....

You will see database tables added. due to how far ill be taking this. There is a lot of stuff happening on the front page. Be sure to acknowledge all the clicking functions and so on. Here are TWO major things i wanted to get finished but DID NOT have time due to running around on the web. not solid instruction. . I will show you in class what I mean.

I wanted ANY search to come up on key, anything from the database. not just the first letter of the "title". I had it 90% working, then errors were everywhere. PHP errors. So ill be dealing with that tomorrow. Also a Prev and Next button for the ID in the movie database... also another thing ill be doing in the near future. I want you to know that i have been working on this assignment since you handed it to us. Ive got 100 movies entered into in. Ive done research along the way. Ive learnt many thing, ive conquered many obstacles. This was a fun learning curb. One thing you should note, when you check my "errors" for validated html 5... its kinda hard with the PHP there... you must know of a way.

THE JQUERY FOLDER THERE IS COMMENTED OUT. I SHOULD NOT GET MARKED FOR HAVING IT THERE AND NOT USING IT. IT WAS FOR THE START OF MY "ID" FINDER FOR THE IDS IN THE DATABASE. PLEASE IGNORE IT AS IT IS NOT IMPORTANT AT ALL!!!!
